

## How-To Guide

Setup Guide for:

U-PROX Readers via U-Prox app

Rev 1.0

Page 1 of 3

## Initial Steps:

- Download U-Prox Config & U-Prox ID from Apple App Store or Google Play
- Short Data 0 (Green) & Data 1 (White) \*Initial Setup Only\*
- Power the reader
- Open U-Prox Config and search for the reader (you will need to be close)

## How-To Guide

Page 2 of 3

- Select the reader once it is found and tap on the plug icon

- Go to "SETTINGS"

Page 3 of 3

From here you will be able to:

- Load the profile that allows the reader to communicate with the U-Prox ID
  App (Please note profile 1359 must appear behind serial number)
  \*Follow this <u>guide</u> to load the profile if using U-Prox ID\*
- Set an Installer code so the reader can be accessed without shorting D0 & D1
- Set the reader format to the required setting for specific cards/tags
- Adjust the Wiegand output as needed \*Our guides are for Wiegand 26 bit\*
- Once settings have been changed, select "Back" to navigate to the previous screen and select "SAVE TO DEVICE"
